EDUCATION

New York University

New York, NY

Major: Data Science and Computer Science | Minor in Business Studies

Expected May 2026

- **GPA:** 3.6/ 4.0 | **Relevant Coursework:** Prin. Of Data Science, Data Structures, Casual Inference, Probability & Statistics

Yonsei University

Seoul, SK

Summer Study Abroad | Mathematics

Jun 2023-Aug 2023

- **GPA:** 4.3/4.3 | **Relevant Coursework:** Linear Algebra

EXPERIENCES

Spotify Data Analysis

New York, NY

Capstone Project for Principals of Data Science | Data Analysis, Python

May 2024

- Analyzed a dataset of 52,000 Spotify songs to understand factors contributing to music popularity and define audio features
- Applied statistical tests and machine learning models for prediction and classification of music attributes and popularity, discovering that instrumentality, though not very effective at predicting popularity, was the best model in doing so
- Determined a strong positive correlation between energy and loudness, which suggests that loudness is a proxy for energy

Business Research

New York, NY

Research Assistant

Jan 2024 – May 2024

- Conducted in-depth research on 50+ business cases to identify correlations and trends, extracting actionable insights to guide strategic decision-making, improvements in business processes, and enhancements to overall organizational strategy
- Explored various applications to delve into the underlying implications and potential impacts of technologies and business
- Research contents are currently confidential and in preparation phase, with findings being developed for future disclosure

NYU Data Science Club

New York, NY

Marketing Committee Co-Director

Sep 2022 – Present

- Designed 200+ posts, emails, and graphics to effectively promote club activities and publications across many social media platforms, increasing awareness and participation throughout the NYU community through strategic communication
- Coordinated 30+ meetings with members to execute impactful marketing campaigns and foster a collaborative community
- Attracted over 100 participants for a Datathon, by incorporating participant feedback, an 80% increase in engagement

Data Clean Room Virtual Machine

Princeton, NJ

3rd Place at GES X UCLA Trustworthy Lab Hackathon | Data Analysis, Python

July 2024

- Led production of a Data Clean Room VM enabling secure analysis of sensitive advertiser data between parties of interest
- Applied Probabilistic PCA to identify key user interest predictors of customer conversion, enabling marketing optimization
- Achieved third place recognition at the GES X UCLA Trustworthy Lab Hackathon for privacy-preserving data analytics

LANGUAGES, SKILLS & INTERESTS

Languages: English (Native), Mandarin Chinese (Fluent), Korean (Elementary)

Skills/Licenses: Python, Java, HTML, CSS, Java Script, NJ Life Insurance, LaTeX, Social Media Marketing, Data Analysis

Interests: Dance, Video Games, Learning Languages, Kpop, Psychology, Track and Field, Crochet, Escape Rooms,
